

Light Burned Technical Grade Magnesium Oxide

DESCRIPTION	MagChem® 30 is a high purity technical grade of magnesium oxide processed from magnesium-rich brine. This fine white powder has a high reactivity index and a low bulk density.		
USES	MagChem 30 is used extensively as a magnesia source where high purity, controlled, moderate reactivity and relative economy are important. MagChem 30 applications include sugar processing, sulfur oxides scrubbing, magnesium salts, construction products, lubrication oil additives and fuel additives.
