

PVP 504

DESCRIPTION: Co-polymer

PVP 504 is a highly pure, water soluble co-polymer synthesized by polymerization of different monomers. It can be used in water-treatment, paper and pulp, mining, cementing, and oil&gas industries by pre-mixing or mixing directly at proper concentrations into the active system.

Properties	Spec.
Appearance	White, off white
Specific Gravity	1.20 – 1.42
Physical Form	Solid/Powder
Water/oil solubility	Soluble
pH	5.5-7.6
Flash point (ASTM D56)	>93°C
Activity	>86%
Order	Odorless

SAFETY NOTICES

Consult the SDS, safety notes, and packaging label before use, Use personal protective equipment as advised.
